Web Development Stacks Comparison

MERN (JavaScript Stack)

- Database → MongoDB
- Backend Framework → Express.js
- Frontend → React.js
- Runtime → Node.js

■ Full JavaScript stack (frontend + backend in one language).

Python Stack (Django / Flask / FastAPI)

- Database → MongoDB / PostgreSQL / MySQL
- Backend Framework → Django (full-stack) OR Flask (micro) OR FastAPI (modern APIs)
- Frontend → React.js
- Language → Python

■ Commonly Django REST Framework (DRF) + React + PostgreSQL is used.

Java Stack (Spring Boot)

- Database → MongoDB / PostgreSQL / MySQL
- Backend Framework → Spring Boot
- Frontend → React.js
- Language → Java

■ Common for enterprise apps with Spring Boot + React + PostgreSQL.

Side-by-Side Comparison

Stack Name	DB	Backend	Frontend	Language
MERN	MongoDB	Express.js	React.js	JavaScript
Python Stack	MongoDB / SQL	Django / Flask / FastAPI	React.js	Python
Java Stack	MongoDB / SQL	Spring Boot	React.js	Java

Stack Name	DB	Backend	Frontend	Language
MERN	MongoDB	Express.js	React.js	JavaScript
Python	MongoDB/SQL	Django / Flask / FastAPI	React.js	Python
Java	MongoDB/SQL	Spring Boot	React.js	Java
.NET	SQL Server/MongoDB	ASP.NET Core	React.js / Angular / Blazor	C#
